

AES-100

AUTO DEALER SOFT TOUCH POLISHER

- Fully automatic.
- Reduces labor.
- Boosts service volume.
- Enhances CSI.

Totally automated, the AUTEC AES-100 applies a lustrous finish to all your vehicles. Simply spray AUTEC paint sealant or polish on the vehicle and press the start button and in a few short minutes the vehicle is prep'd and ready for the customer.

Your service department will sparkle in your customers' eyes. But they'll never have to know how easy it is to polish a car with the AUTEC AES-100. The hard work under the hood may go unnoticed; but, an AUTEC shine is unmistakable and impossible to ignore. It's safe with no scratching, streaking or swirling. Talk about polishing "your" image.

AIR SUPPLY
5 CFM

RECOMMENDED
BAY SIZE
32' LENGTH
16' WIDTH

WE MAKE MORE THAN CAR WASHES. WE MAKE SUCCESS STORIES!

AES-100

Features

Benefits

<i>All Welded Frame</i>	<i>Welded, not bolted for superior structural integrity, ensuring enhanced machine longevity & performance.</i>
<i>Hydraulic Operation</i>	<i>Variable speed hydraulic drive for smooth operation provides control of the torque and speed of each arm for effective polishing without damage.</i>
<i>Direct Drive</i>	<i>No chains, gear boxes or belts to require maintenance.</i>
<i>Soft Touch Technology & Horizontal Top Buffer</i>	<i>Double front and rear side arms ensure that every area of a vehicle's surface is gently massaged to a beautiful shine. Our horizontal top buffer details all flat surfaces as it lifts easily over the tops of cars, vans and trucks. It gently follows the contours of all vehicles without troublesome electric sensors. Thousands of polishing strips provide safe polishing without scratching, streaking or swirling. Years of research and testing have determined the best sizes, lengths, cuts, cores and hardware to ensure unprecedented polishing performance.</i>
<i>Split Hub Design</i>	<i>The lower section is wide to contour to curved vehicle undersides. The top is slim to accommodate tops of vans and trucks with large mirrors. We call this our "mirror-saving" hub design – ensuring safe, thorough polishing.</i>
<i>On-board, Self-Diagnostic Computer</i>	<i>On-board computer minimizes electrical requirements for fast, economical installation. Additionally, self-diagnostic software monitors polisher functions.</i>
