

AES-220

AUTO DEALER SOFT TOUCH CAR WASH

- Compact
- Efficient
- State-of-the-art
- Designed specifically for auto dealers

AUTEC's AES-220 washes thousands of new and pre-owned cars every day, in auto dealer installations all across the country. If you're interested in enhancing customer satisfaction at your dealership, the AES-220 is the system for you.

Unprecedented wash quality; profitable, trouble-free operation; and long-term efficiency and durability are attributes of **all** AUTEC systems.

We ensure these high performance levels by utilizing carefully monitored production controls and by the use of superior quality components: Soft cloth or polyflex for safe, thorough cleaning; simple, yet durable, hydraulic operation for the most gentle vehicle surface massage; reliable, self-diagnostic, software-driven controls; all stainless-steel construction, for optimum structural integrity, and dependable, wet-environment operation.

32' LENGTH
16' WIDTH**

**MAXIMUM
CAR SIZE
110" WIDTH
84" HEIGHT**

WE MAKE MORE THAN CAR WASHES...WE MAKE SUCCESS STORIES!

AES-220

<i>Features:</i>	<i>Benefits:</i>
Water-based Hydraulic Operation	<i>Specially designed water-based hydraulic fluid makes the machine environmentally friendly in all circumstances.</i>
Stainless Steel	<i>Absolutely the most durable construction for dependable, long-term operation in harsh car wash environments.</i>
All Welded Frame	<i>Welded, not bolted, for superior structural integrity, ensuring enhanced machine longevity & performance.</i>
Dual Arm Support	<i>Keeps arm rotation true and consistent on all four arms.</i>
Hydraulic Operation	<i>Variable speed hydraulic drive for smooth operation provides control of the torque and speed of each arm for effective cleaning without damage.</i>
Direct Drive	<i>No chains, gear boxes or belts to require maintenance.</i>
Soft Cloth or Polyflex Friction	<i>Double front and rear side arms, plus our dual cloth mitter ensures that every area of a vehicle's surface is gently massaged clean with the use of soft cloth (standard) or polyflex (optional) strips lubricated with just the right volume of soap and water. Years of research and testing have determined the best sizes, lengths, cuts, cores and hardware to ensure unprecedented cleaning performance.</i>
Split Hub Design	<i>The lower section is wide to contour to the curved vehicle undersides. The top is slim to accommodate the tops of vans and trucks with large mirrors. We call this our "mirror-saving" hub design – ensuring safe, thorough cleaning.</i>
Overhead Mitter	<i>The double action, overhead mitter effectively cleans all flat surfaces without the dangers and damages once associated with top brushes.</i>
Mitter Retract	<i>Accommodates full or partial retract option for vehicle safety during entry and exit.</i>
Self-Diagnostic Computer	<i>Self-diagnostic software monitors car wash functions.</i>
On-board Chemicals & On-board Drive-through Rinse Arch	<i>Eliminates the need for a separate equipment/utility room. Allows for faster, more economical installation. Operates in only 30' of bay length, although 32' is recommended.</i>
Hydraulic Tank Heater	<i>Keeps hydraulic oil warm to ensure consistently smooth equipment start up.</i>
