

# INTRODUCING

# RAZOR

ENHANCED • DESIGN • GLOBAL • EXPERIENCE

# EDGE

Razor® EDGE, Enhanced Design Global Experience, has all of the reliable Razor components that you have come to depend on but now includes an intense customer experience! Razor EDGE features all new elements such as HyperFlex, LumenArch and SpectraRay.

## HYPER FLEX

HyperFlex heightens the dynamic cleaning experience of Razor EDGE. With HyperFlex, 2 product applications can be applied at the same time resulting in a dramatically reduced wash time. When used in conjunction with SpectraRay, customizable LED lights shower the vehicle with a blanket of color to create the ultimate experience!

## LUMEN ARCH

LumenArch includes 324 dazzling LED lights that create an eye-catching glow of the spray arch both during product applications and while idle. During product application, the LED lights illuminate the product being applied as well as the interior of the vehicle to create a unique, appealing car wash experience!

A spectacular array of 4,528 LED lights fill the wash bay with SpectraRay! The red, magenta, blue and green LEDs are fully customizable to add splashes of various colors during any or all of the product applications to accentuate the entire wash process. Even when idle, SpectraRay can sequence through color to draw attention to the wash bay with an eye catching light show making it unique and memorable for perspective customers!
